

LEAF COVER MANUAL

Step 1: Take leaf cover out of box, compare and make sure all the parts are available like the first picture. Insert the fiberglass poles into the sleeve of leaf cover. (Note: Insert the fiberglass poles needs 2 people work together, when one inserts the fiberglass pole, the other stretches the net in the other side to let the fiberglass poles go through smoothly.) Then you can join the ends of two fiberglass poles together. (The shortest pole should be assembled together at last.)

Step 2: After all the fiberglass poles are connected together, stand on the jumping mat, lift the leaf cover and tie all black straps to the safety net's fiberglass poles or caps. After these steps, the leaf cover assembly is finished!

Remark: Fiberglass quantity for each size leaf cover

Leaf cover size	Fiberglass quantity(pcs)	Leaf cover size	Fiberglass quantity(pcs)
8ft	6+1	16ft	12+1
10ft	7+1	7x10ft	7+1
12ft	9+1	8x12ft	9+1
14ft	10+1	10x17ft	12+1
